### SUMMARY

Through project-based studies at my university, I have developed strong skills in front-end and back-end development, as well as UX/UI design principles. I can develop a web application using the technologies listed, and I am enthusiastic about learning new technologies. As a university student seeking employment, I am eager to learn new skills, reliable, motivated, and capable of handling multiple tasks. I am enthusiastic about contributing to and learning from the field I am working in.

### TRAINING / COURSES

#### Ethical Hacking

Purple.com
